

# The Longing of the Ren-Bird

This is the title song of Eaglechild's fanfiction

"The Longing of the Ren-Bird"

inspired by The Legend of Zelda: Ocarina of Time

Eaglechild

The Ren-Bird is a legendary bird that lives in the Gerudo Desert. When the Goddess of Sand created it, she covered its wings with melted sand, so the feathers reflected the light like a mirror. The Goddess fell in love with her creation and she wanted it to be unique. But the Ren-Bird could only love one of its own kind, so it searched forever in the sky for a mate.
